Drive Types and Replacement Driver Bits

It is necessary to use the right driver bit to ensure optimum results with a Quik Drive system. The bit(s) included in each box of Quik Drive screws should be sufficient to drive the entire box, however variations in materials and driving techniques can shorten driver-bit life. Replacement bits are available in Bit Packs; reference the label on the bit included in the box or the box label to ensure correct driver-bit selection (see table above for Bit Pack quantities and model numbers).

	DRIVE TYPE/SIZE	BIT	DESCRIPTION
	#2 square drive	R2	BIT2S – for most screws with #2 recess and interior-grade coating
	#2U (#2 undersized)	R2U	BIT2SU – for most screws with #2 recess and exterior-grade coating
	#3 square drive	R3	BIT3S – for most screws with #3 recess and interior-grade coating
	#3U (#3 undersized)	R3U	BIT3SU – for most screws with #3 recess and exterior-grade coating
(+)	#2 phillips	P2	BIT2P – for all Quik Drive screws with phillips recess
	1/4" lobular hex drive		BITHEXLB14 – For most screws with 1/4" lobular hex drive
	5/16" lobular hex drive		BITHEXLB516 – For most screws with 5/16" lobular hex drive
