OVER 160 JOBSITE SOLUTIONS

GAME-CHANGING SOLUTIONS

At Milwaukee, the phrase "good enough" doesn't exist in our vocabulary. Our goal is to solve problems in ways that have never been done before. The result: tools that offer unmatched levels of performance, productivity and life.

BUILT ON
THE BEST FOUNDATION

REDLITHIUM™ BATTERIES

They last longer, think faster and work harder than all other professional LITHIUM-ION batteries. Built to withstand even the harshest environments, REDLITHIUM™ batteries deliver more work over the life of the battery, no matter what the job.

MILWAUKEE® HIGH PERFORMANCE MOTORS

Highly advanced motor technology boosts efficiency, generating more power from a compact power source. That means the ultimate performance, durability and run-time comes in a smaller, lighter package.

REDLINK™ INTELLIGENCE

An advanced combination of hardware and software, REDLINK™ Intelligence enables full-circle communication between our batteries and tools, allowing for unmatched levels of performance, protection and productivity.

USER-DRIVEN INNOVATIONS

Our mission in cordless design is to introduce new solutions that make tradesmen on the jobsite more productive. Working side by side with users during the design and testing process gives us the ability to deliver game-changing solutions. Whether it be bringing cordless power to traditionally corded products and manual activities or advances to fundamental tools, our drive to improve workplace productivity will continue to help us push the envelope of innovation and design.

M12™ ProPEX® Expansion Tool
INDUSTRY'S FASTEST ProPEX® INSTALLS

Designed for easy one-handed use, the M12™ ProPEX® Expander makes installing Uponor ProPEX® fittings a breeze, without the time-consuming maneuvers required to manually expand tubing. It features an auto-rotating head and continuous expansion for quick, one-handed operation in tight spaces.

M18™ LED Stand Light
THE BRIGHTER, TALLER, TOUGHER STAND LIGHT

Capable of filling large areas with light, the M18™ LED Stand Light provides up to 2,000 lumens, with a run-time up to 10 hours. Set it up in mere moments, and extend the pivoting light head from 4' – 7' to light overhead work or cast light downward to minimize shadows. Its reinforced legs provide a stable base to protect against falling over and its light head nests into a protective shroud for peace of mind during transport.

M18 FUEL™ 1-1/2" Magnetic Drill

FASTER THAN CORDED **STRONGEST** MAGNETIC HOLD ON 1/4" STEEL **40** 13/16" **HOLES** PER CHARGE

The M18 FUEL™ Magnetic Drills deliver the performance and run-time expected by corded magnetic drill users. They also deliver the strongest magnetic hold on 1/4" steel and a magnetic base that operates without electricity; providing a safer drilling environment in 1/4" steel. These tools utilize permanent magnets to ensure the magnetic base does not deactivate if the battery is drained.

M18™ FORCE LOGIC™ 600 MCM Crimper
THE MOST RELIABLE WAY TO CRIMP

The M18™ 600 MCM Crimper's proprietary jaw design holds the connector for instant alignment, and easily and quickly resets for the next crimp. The industry's first adaptive control system, Predictive Force Monitoring (PFM™), ensures optimal pressure is reached each and every time. Equipped with ONE-KEY™ technology, users will have the data to track the success and timing of electrical terminations.

M18 FUEL™ SUPER HAWG™ 1/2" Right Angle Drill

POWERS THROUGH 6" HOLES OVER **75** 2-9/16" **HOLES** PER CHARGE **CORDLESS** ROUGH-INS

The first cordless tool of its kind, the M18 FUEL™ SUPER HAWG® delivers the power and run-time to complete full cordless rough-ins. Optimized for large diameter hole drilling, the M18 FUEL™ SUPER HAWG® powers through 6" holes and has the ability to drill over (75) 2-9/16" holes per charge. The QUIK-LOK™ chuck provides quick, one-handed bit changes, eliminating downtime and increasing productivity.

M18™ FORCE LOGIC™ 10 Ton Knockout Tool
THE EASIEST WAY TO PUNCH

The Milwaukee® Knockout System makes every step in the hole making process both faster and easier. The EXACT™ punches and dies are set up separately from the tool for extreme ease of use, utilizing a quick connect alignment system that allows the user to snap the tool onto the punches and dies without fighting against its weight, and pull the trigger to punch the hole with ease.

M12™ Band Saw
ONE-HANDED POWER AND PORTABILITY

The M12™ Band Saw is the lightest and most compact cordless band saw on the market with less than half the size and weight of deep cut band saws. Not only ideal for one-handed cutting applications because of its size, it has a fully integrated guard that covers the blade outside of the active cutting area. With a 1-5/8" x 1-5/8" cut capacity and low vibration, the M12™ Band Saw delivers clean cuts on the most common small-diameter metal cutting applications.

HIGH PERFORMANCE MOTORS

The Milwaukee® POWERSTATE™ brushless motor converts energy into power and torque more efficiently, resulting in superior application performance. The POWERSTATE™ brushless motor has nearly 4X the amount of power-generating components than the competitor's brushless motor. It also features higher-grade, rare-earth magnets and greater copper content.

FORCELOGIC™

What is FORCE LOGIC™?

FORCE LOGIC™ is engineered to not only improve upon, but fundamentally change the way high-force tools are used in the field. Through thoughtful design and innovation each tool simplifies a complicated process to deliver the best user experience of its kind. Whether it's the 2" – 3" PEX Expander that auto-rotates and auto cycles for the most consistent installs or the M12™ and M18™ Press Tools' inline design with easy open jaws that allows you to press anywhere you can reach, FORCE LOGIC™ always delivers the smartest way to work.

THE SMALLEST, MOST INTELLIGENT PRESS TOOLS

Compact Size
The industry's smallest and lightest press tools offer a better-balanced, in-line design for unrivaled access and ergonomics.

Reliability
A best-in-class calibration interval means up to 4X the connections between service.

REDLINK™ Intelligence
Electronic Force Monitoring maintains even pressure throughout the press cycle, providing a green indicator light to ensure a good connection. REDLINK™ Intelligence communicates with the tool and battery to automatically shut off when not in use, preventing battery drain. A pre-press battery check ensures enough charge to complete each press.

Why Press?

Press is a method of joining pipe that uses force to make a connection, eliminating the need to solder, braze, thread, or weld. Utilizing only three short steps, connections can be completed up to 50% faster than traditional methods and don't involve an open flame. Most importantly, press eliminates the need to drain and dry a system, enabling fast, professional repairs and increased productivity.

- Saves time
- More consistency
- Safe – No open flame
