## Glo-Mega® Omega II®

**Glow-in-the-Dark head protection great for the mining industry, ship yards, underground utilities, and night highway construction.**

Meets ANSI/ISEA Z89.1, Type 1, Class C, E and G requirements

Q: What causes the Glo-Mega to glow?

A: The glow is caused by photoluminescence, commonly referred to as glow-in-the-dark. The materials used in the Glo-Mega are nothing at all like the glow-in-the-dark materials of several years ago. They charge quickly and glow much brighter and much longer than the glow-in-the-dark items you may remember having as a child.

Q: How long does it take to charge the Glo-Mega?

A: Charging for 10 to 20 minutes in sunlight would be excellent to produce a strong long lasting glow. A half hour in bright fluorescent light would be very good. Even 20 minutes near a 40 watt incandescent bulb will generate a significant glow.

Q: How brightly does the Glo-Mega glow?

A: In intermediate levels of lighting, the Glo-Mega takes on a greenish color as the glow competes with the light from its surroundings. In dark conditions, the Glo-Mega's glow has been measured at 1220 mcd/m2 immediately after charging and, after ten minutes was still 45 times as bright as required by ASTM 2073 for emergency signage.

Q: How long can the glow be seen?

A: To eyes accustomed to the dark, the glow can be seen for several days or even weeks after a suitable charge.

Q: How does the after-glow of the Glo-Mega fade?

A: The fading begins as soon as the source of charging is removed - faster at first, then slowing over a long period of time. For a number of hours, this fading is partially offset by a dramatic increase in the sensitivity of the eye to see light.

Q: What is the useful life of the product?

A: The Glo-Mega has the normal life span of a molded polyethylene safety helmet. The photo luminescent properties however, should last almost indefinitely.

## MEGA RATCHET®

The "Secure-Fit" ratchet features an easy turn knob that allows size adjustment from head sizes 6.5 to 8 without removing the helmet. Each turn of the ratchet knob automatically locks with 50 meshing teeth securing the position. The no-slip hold maintains the desired fit even in the most physically active jobs or extreme weather conditions. The hinged ratchet fits low on the nape of neck and is height-adjustable for a perfect fit. The ratchet mechanism is cushioned with thick sponge padding for long-lasting comfort.

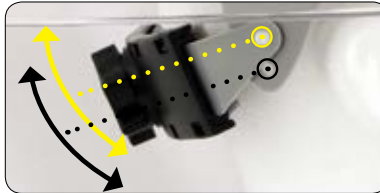

Easy Turn Knob

Easy turn knob adjusts to over 40 different head sizes!

Two Position Hinge

The nape section of the Mega Ratchet® suspension is attached by two plastic pins which are repositionable to accommodate a wide variety of head shapes.

Cushion

Inner side of ratchet is covered in a cushioning foam pad.

**ANSI/ISEA 107-2010  
Flame Resistant vs. Flame Retardant**

**Flame Resistant** apparel are garments which are tested and meet various industry standards that require self-extinguishment of the garment after exposure to flames or sparks.

**Flame Retardant** is a chemical used to treat materials which then may or may not meet any accepted industry standards.

ANSI/ISEA 107-2010 uses the term Flame Resistance for high visibility garments which fully meet one or more of the following standards:

- ASTM F-1506
- ASTM F-1891
- ASTM F-2302
- ATSM F-2733
- NFPA 1971
- NFPA 1977
- NFPA 2112

Purchasing a vest requires careful selection to ascertain if the garment will protect a worker from sources of heat or ignition that may be present in the work zone. Some commercially available garments listed as FR treated may not give the level of protection called for by the ANSI/ISEA standard, and may not last for more than one wear/wash cycle, nor may all components have flame resistant properties even if the label states that it meets ANSI/ISEA 107-2010. **The label must indicate one of the foregoing ASTM or NFPA standards to be considered Flame Resistant under the ANSI/ISEA 107 standard.**

## LOGO. LEADER.

### SCREEN PRINTING

Let ERB handle your Screen Printing needs. Low minimum order quantities of 12 pieces, low cost and fast lead times! We use polyester based ink to ensure your logo is top quality and will properly adhere to the garment. Print up to 4 colors.

### CUSTOM VINYL TRANSFER PRINTING

With a low minimum order of 12 pieces, ERB makes it easy to order Custom Vinyl Transfer Printing. Choose from full color, multi-color or complicated designs. Unlike screen printing, vinyl lays over mesh holes on the vest, allowing for more accuracy and precision.

### CUSTOM EMBROIDERY

ERB also offers Embroidery services! Low minimum order quantities of 36 pieces, low cost and fast lead time! Whether it be on a safety vest, polo shirt or boonie hat, ERB can service your needs. Call for your quote now on up to 10,000 stitches and unlimited colors.

\* Minimum area of background material required for ANSI compliance may not be met if excessively large text or logos are printed on garment.

\*All custom orders are subject to a 5% overage or shortage.
