FinishPro® 35Mg

15 Ga. Magnesium Finish Nailer

The FIP35Mg's magnesium body delivers an ultra-light tool with SENCO dependability. The oil-free design, selective actuation, rear exhaust, rotating belt hook, and push-button air blower combine to provide a tool that will perform the toughest jobs while delivering professional results and comfortable operation.

Applications

Finish and trim, baseboard, cabinets, caskets, chair rail, decorative trim, door & window casing, furniture trim and paneling.

Features and Benefits

- Magnesium mainbody provides a durable and ultra-light tool for comfortable extended use.
- Oil-free motor eliminates oil carryover onto the work surface.
- Push-button air blower can dust off excess drywall powder, sawdust, dirt and debris from the work surface.
- Metal cylinder for increased durability.
- Tool-free depth-of-drive adjustment delivers perfectly countersunk fasteners into a variety of materials.
- Selectable trigger lets you control the fastening method with the flip of a switch.
- Rotatable exhaust and belt hook keeps dust and debris off the work surface while keeping your tool at the ready.
- Over-molded rubber grip, swivel plug and reload indicator will keep you working comfortably and efficiently throughout the day.
- Includes case, swivel plug and wrench.

Specifications

Item#	6G0001N
Trigger	Sequential actuation
Reg. Operating Pressure	70-120 psi (4.8 - 8.3 bar)
Air Consumption (60 cycles per min.)	3.2 scfm
Air Inlet	1/4" NPT
Tool Weight	4.65 lbs (2.1 kg)
Height	12.25" (311 mm)
Length	13" (330 mm)
Width	3.4" (86 mm)

Fastener Specifications

Gauge	15
Capacity	110
Fastener Range	1/4" - 2 1/2" (32mm - 65mm)
Finish	Bright Basic, Galv. & Stainless
Collation	34° angles mylar taped strip

SENCO® 15 Ga. 34° Angled Strip Finish Nails

Furniture and cabinets, molding and trim, baseboard, chair rail, doors and window casings

FinishPro® 35Mg

Features

*Choose the right actuation mode!

Sequential Actuation (also known as restrictive trigger or trigger fire) operates in the following sequence - depress the safety element at the nose of tool against the work surface then pull the trigger. After each fastener is driven, release the trigger and lift the tool off the work surface before starting the sequence again. This trigger is recommended and acceptable for most applications.

Contact Actuation (also known as dual action, bounce or bottom fire) operates in the following sequence- pull the trigger first and keep the trigger pulled while moving the tool along the work surface with a bouncing motion, depressing the safety element at the nose of the tool against the work surface where the fastener is to be driven. This trigger is recommended for use by trained professionals only in high production or volume applications.

Always read the Operators Manual and Safety Instructions with all tool to ensure proper use and safety precautions. For additional information on trigger systems and how Senco will save you time, reduce costs and increase quality, call our toll-free Action Line: 800-543-4596, or visit our website at: www.senco.com
